Tango/04, finalist in the 'European IT Excellence Awards'

- IT analysts IT-Europa nominate Tango/04 in the category Pan-European awards
- The awards ceremony will take place in Frankfurt at the end of February 2008
- The monitoring and automation project at Swiss/Spanish Insurer Helvetia Previsión catches the judges' attention

BARCELONA, 01/02/2008 - Tango/04 Computing Group, leading developer of software for Systems Management, Security Auditing and Business Service Management has been nominated to receive the Pan European IT excellence awards by IT analysts IT-Europa. The awards ceremony will take place in Frankfurt Germany at the end of February. Tango/04's successful implementation of its 1-2-3 Monitoring Suite at Swiss/Spanish insurer Helvetia Previsión was the key to Tango/04's nomination.

Nominees include HP, Fujitsu-Siemens and for instance Avaya. The nominated companies are from various European nations but only Tango/04 and an Italian company represent Southern European IT-excellence. *'Regardless of the size and location of the nominated companies, the quality of the presented solutions is extremely high and shows how much talent there is in Europe's IT industries'* Alan Norman, IT-Europa director in an explanation of this year's IT-excellence short list .

In case of winning the award, Tango/04 would be adding yet another price to its long list of awards won. This list includes the 'Editor's Choice APEX Awards' won in 2004, the IBM iSeries 'product of the year', also in 2004, and the IBM 'All Star Partner Award'. Currently, Tango/04 is IBM's only Autonomic Computing partner on the Iberian Peninsula.

For Raúl Cristián Aguirre, Tango/04's CEO & Founder, this important nomination *"is the result of our perseverance and the success we had developing and implementing monitoring solutions to monitor a company's IT-infrastructure, Security & Compliance, and Service Level Management (SLM) and Business Services Management (BSM). We are at the forefront of European IT excellence. "*
