

Tango/04 Monitoring and Security Solutions are IBM i 7.1 Ready

- Tango/04 reaffirms its commitment to the System i by fully supporting IBM's new Operating System from day one
- Tango/04 can monitor not only IBM i partitions but all the operating systems running in a POWER7 box (Linux, AIX, and integrated Windows servers) as well as middleware and applications running on top of them.

PETERBOROUGH, NH, April 28th 2010. – Tango/04 Computing Group, Inc., a leading developer of software solutions for Enterprise Monitoring, Business Service Management (BSM), IT Security, Compliance, and Operations Monitoring announced today the **full compatibility of all of its products on IBM's new i 7.1 Operating System in all supported systems, including the latest POWER7 hardware.**

IT departments already using or planning to use IBM i 7.1 in their production environments can easily upgrade their versions of Tango/04 software products to their latest versions to take advantage of the performance and security improvements of IBM's new release of its midrange operating system.

Supported products include, among others:

- **VISUAL Message Center**, Tango/04's flagship, award-winning, multiplatform Operations Monitoring and Business Service Management software solution. All the monitoring modules are compatible, including Server Agent, Interactive Agent, Security Agent, SQL Monitors, Support Agent, Remote Control (keyboard capture), remote (agentless) monitoring agents, and Performance Agent (powered by VISUAL Control for Windows).
- **VISUAL Security Suite**, Tango/04's leading security and auditing solution, including the Security Agent and SQL Monitors.
- **Tango/04 Data Monitor**, a unique, real-time, record-level database auditing solution that helps companies comply with the Sarbanes-Oxley Act (SOX), HIPAA, 21 CFR Part 11, and other regulations by capturing read, insert, update, and delete transactions performed on IBM DB2 for i databases.
- **VISUAL Control Center**, a solution to accelerate and control IBM i systems, achieving better response times, guaranteeing predictable service levels, and automating system management tasks.

Raul Cristian Aguirre, Founder and CEO of Tango/04 Computing Group said: *"By adding i 7.1 to the wide list of systems supported by our solution we are making it clear that we continue to be loyal to the IBM i Platform, just like we've been since the first day the company was founded in 1991, and just like it's going to continue in the future. This was the first system we supported, the one that propelled our professional lives forward, and the one that will always be in our hearts."*

Tango/04 has a wide range of products that have been thoroughly tested to support i 7.1, and Tango/04 Monitoring solutions have been implemented in 11 of the world's 20 largest banks, and more than 2000 companies around the world, including 3M, Bayer, and Nike. Moreover, Tango/04 can monitor not only

IBM i partitions but all the operating systems running in a Power box (Linux, AIX, and integrated Windows servers) as well as middleware and applications running on top of them. Find out more information about them at www.tango04.com or address your inquiries to sales@tango04.net.
