

Midsize Enterprise Summit East, another opportunity for Tango/04 to strengthen its commitment to midsize companies

- The company will participate in the third event aimed at midsize companies in a month, and will hold two boardroom sessions.

Barcelona, 13th April 2010 – Tango/04 Computing Group, the European leader in Enterprise Monitoring software, will participate next April 18 – 21st as a sponsor at the Midsize Enterprise Summit East. The event will take place in Boca Raton Resort, Boca Raton, FL.

The theme of the event will be: “2010: The Process of Reengineering IT.” The focus—enabling strategic IT Decision-Making—embraces midmarket-specific issues, trends, and solutions from a horizontal and vertical industry-specific perspective.

Last month, Tango/04 already participated at the Midsize Enterprise Summit Regional Series Boston, held on March 11th in Boston, and a few days later, at the IT Business Edge 2010 Midmarket CIO Forum, which took place March 14 – 16th in Orlando, FL. Now it’s time to move on to the Midsize Enterprise Summit East, where Tango/04 will be participating for the third time.

Nicolas Brosky, North America Operations Manager of Tango/04, said: *“Our previous experiences were absolutely great. The environment provided by the event allowed us to explain in detail how monitoring can be used in many different ways and we’ve always received really positive feedback from everyone regarding the idea of a Service-Oriented Monitoring approach where Technology, Security, and Business can work together with the same platform. This is why we didn’t hesitate to participate again.”*

Tango/04 will participate by holding two boardroom sessions in which it will present its exclusive “1-2-3” monitoring strategy, their innovative approach that offers a unified multiplatform solution to monitor Technology, Security and Business. The company will also be available for meetings at its booth. Contact Tango/04 at salesusa@tango04.net and make an appointment to meet them!

About Tango/04 Computing Group

Tango/04 Computing Group is one of the leading developers of monitoring software of Technology, Security/Compliance, and Business Service Management (BSM).
