Tango/04 VISUAL Message Center, Distinguished with IBM's ServerProven Status

- Tango/04's IT monitoring and BSM solution achieves the IBM ServerProven status after verification by IBM of successful customer implementations
- Customers buying IBM ServerProven solutions benefit from special rebates

PETERBOROUGH, NH, November 24, 2006 – [VISUAL Message Center](#), Tango/04's IT operations monitoring, Business Service Management (BSM) and Service Level Management (SLM) software solution, receives the [IBM ServerProven™](#) designation for the third year running.

IBM ServerProven status is awarded to software applications that are enabled for IBM eServer and are verified through customer experience to be installed and running in at least one customer location. In order to renew its ServerProven status, Tango/04 provided IBM with a series of international customer experiences. IBM interviewed Tango/04's customers to verify the business value delivered by Tango/04 VISUAL Message Center.

"We have worked very hard to offer operators, CIOs and top-level management the BSM and SLM tools they needed to easily align their IT infrastructure with their companies' business objectives," said Raúl Cristián Aguirre, CEO of Tango/04 Computing Group. *"Obtaining IBM validations such as ServerProven is proof of the successful results of our effort".*

Solutions bearing the ServerProven designation have been implemented in a real-world, production environment. By considering ServerProven solutions, customers can learn about real-life installation examples that can help promote confidence in selecting software applications to run on IBM eServer platforms.

"VISUAL Message Center can assess in real-time the impact on the business services of any IT infrastructure event. New customizable dependency rules and new Business Service Management reports help you comply with SLAs and meet expected business results, without the need to implement additional software products and with the same ease of use as today," explained Mr. Aguirre.

IBM ServerProven solutions offer significant added value to IBM eServer systems. Customers of IBM ServerProven solutions benefit from special offers and rebates.

Tango/04 VISUAL Message Center

VISUAL Message Center, Tango/04's suite of products for the management of IT infrastructures, provides a convenient technological foundation for the development of Business Service Management (BSM) and Service Level Management (SLM) strategies. Its advanced monitoring, automation, alert, visualization, reporting and auditing functions consolidate and simplify the management of multiple systems, applications, networks, devices and all the components of an organization's IT infrastructure.

About Tango/04 Computing Group

IBM ServerProven is a marketing program. Use of the IBM ServerProven trademark on a product indicates the participant has obtained approval of a submission of information concerning one or more end user customers that have implemented its product on the indicated IBM hardware or software platform(s) and engaged in an enablement activity. IBM does not warrant that results obtained in end-user customer experiences are typical of those encountered by the participant's customer, nor that any installation will be free of errors. Potential customers of this product(s) are responsible for determining whether any particular participant's products or services are suitable for their own needs. The participant should be contacted regarding this software product and such items as installation, support, education, documentation, maintenance and any other terms and conditions. All understanding, agreements, or warranties concerning any product must take place directly between the participant and the customer.

IBM makes no warranties of any kind with respect to the participant's product. Specifically, IBM does not warrant the quality of any third-party products, or the ability of any such third-party products to interoperate with IBM's products. IBM expressly disclaims all warranties, expressed or implied, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. This disclaimer does not apply in the United Kingdom or elsewhere to the extent inconsistent with local law.
