FOR IMMEDIATE RELEASE

## IBM again distinguishes Tango/04 VISUAL Message Center with the ServerProven status

- Tango/04's systems management and BSM solution achieves again the ServerProven status after verification of successful customer implementations by IBM
- Customers buying IBM ServerProven solutions can benefit from special rebates

BARCELONA, Spain, July 7, 2005 – Tango/04 Computing Group, a leading developer of software solutions for Systems Management, Security and Business Service Management (BSM), today announced that IBM has confirmed for another year the ServerProven designation for Tango/04's VISUAL Message Center suite of monitoring, automation, alerting and reporting software products.

IBM ServerProven status is for software applications that have been enabled for IBM eServer and have been verified through a customer experience to be installed and running in at least one customer location. In order to renew its ServerProven status, Tango/04 provided IBM with a series of international customer experiences. IBM interviewed Tango/04's customers to verify the business value delivered by Tango/04 VISUAL Message Center.

*"With VISUAL Message Center we are delivering to our clients the most advanced, effective and easy to use Business Service Management solution", said Raúl Aguirre, CEO of Tango/04 Computing Group. "IBM's confirmation of its ServerProven designation recognizes the value and business benefits we provide to our customers".*

Solutions bearing the ServerProven designation have been implemented in a real-world, production environment. By considering ServerProven solutions, customers can learn about real-life installation examples that can help promote confidence in selecting ServerProven software applications to run on IBM eServer platforms.

*"Our challenge is to keep improving our VISUAL Message Center solution to align the management of IT infrastructure with the business objectives of our clients. We work very hard to earn the confidence of our customers and partners, and obtaining IBM's validations such as ServerProven are a proof of our effort", Raúl Aguirre added.*

IBM ServerProven solutions offer significant value-add to IBM eServer systems. Customers of IBM ServerProven solutions can benefit from special offers and rebates.

## **Tango/04 VISUAL Message Center**

VISUAL Message Center, Tango/04's suite of products for the management of IT infrastructure, provides a convenient technological foundation for the development of Business Service Management (BSM) strategies. Its advanced monitoring, automation, alert, visualization, reporting and auditing functions consolidate and simplify the management of multiple systems, applications, networks, devices and all the components of an organization's IT infrastructure.

## **About Tango/04 Computing Group**

Tango/04 Computing Group is one of the leading developers of systems management and automation software. Tango/04 software helps companies maintain the operating health of all their business processes, improve their service levels, increase their productivity, and reduce costs through intelligent management of their IT infrastructure.

Tango/04 has more than a thousand customers who are served by over 35 authorized Business Partners around the world.
